Career Objective

Highly motivated B.Tech Cybersecurity and Digital Forensics student with a deep passion for problem-solving, competitive programming, and systems architecture. Proficient in C++ (DSA, STL, OOP) and Java, with hands-on experience in runtime bytecode manipulation. Seeking a challenging software engineering or security internship where I can apply my optimization skills to build secure, robust, and high-performance software systems.

Education

- **Degree:** B.Tech in Cybersecurity and Digital Forensics
- **Institution:** VIT Bhopal University
- **Year of Graduation:** 2027
- **CGPA:** 8.3 / 10

Technical Skills

- **Programming Languages:** C++ (Advanced – DSA, STL, OOP), Java, Python, SQL
- **Core Disciplines:** Data Structures & Algorithms (DSA), Competitive Programming, Object-Oriented Programming (OOP)
- **Tools & Technologies:** Linux, Git, GitHub, Wireshark, MySQL, VS Code, Node-RED
- **Professional Competencies:** Analytical Problem Solving, System Security, Team Management, Technical Communication, Technical Sales & Business Growth Ideation

Technical Projects

JVM Bootstrapping & Custom ClassLoading Sandbox

Technologies Used: Java, Java Reflection API, Bytecode Manipulation, Git, PowerShell

- **Dynamic Bytecode Injection:** Override the JVM's native `findClass()` and `defineClass()` mechanics to design a custom ClassLoader capable of dynamically loading and parsing binary `.class` streams from decoupled external directories.

- **Parent Delegation Analysis:** Explored the JVM's architectural ClassLoader hierarchy (Bootstrap, Platform, and Application loaders) to analyze runtime security boundaries and implement core runtime isolation strategies.
- **Runtime Execution via Reflection:** Leveraged the Java Reflection API to instantiate decoupled modules and invoke target methods dynamically at runtime, entirely eliminating compile-time dependencies.

Academic and Technical Strengths

- **Problem Solving:** Solved 200+ complex DSA problems across major competitive programming platforms.
- **Competitive Coding:** Consistent daily practice focusing on algorithmic optimizations, time/space complexity minimizations, and advanced data structures.
- **Academic Excellence:** Recognized for sustained, consistent academic performance across core computing and security domains.

Online Internships & Training Programs

IBM – Adroit Technologies | Cybersecurity Training Program

Duration: 2 months

- Completed structured industry training focusing on modern cybersecurity frameworks, data privacy paradigms, and enterprise security operations.
- Engaged in interactive daily technical sessions, hands-on vulnerability analysis labs, and packet-level threat hunting exercises using Wireshark.
- Successfully cleared the comprehensive final technical assessment to earn professional validation.

Certifications

- **Programming in Java** (Professional Certification)
- **Microsoft SC-900** (Security, Compliance, and Identity Fundamentals)
- **Blockchain and its Applications** (NPTEL – Ministry of Education)
- **IBM Certified Specialist** (CECSA1IN Cybersecurity Domain)
- **Google IT Support Professional Certificate** (Full Specialization)
- **The Bits and Bytes of Computer Networking** (Coursera / Google)
- **Python Programming Specialist** (Technical Certification)
