CAREER OBJECTIVE

B.Tech Computer Science Engineering student specializing in Cybersecurity with strong foundations in Data Structures, Algorithms, and Software Engineering. Proficient in C++ and Java with experience in backend development and system memory management. Seeking a Software Engineering or Security Internship to develop efficient and secure software systems.

EDUCATION

VIT Bhopal University | Graduation: 2027

Bachelor of Technology in Computer Science Engineering (Cybersecurity & Digital Forensics)

- **CGPA:** 8.3 / 10

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, SQL
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Systems Architecture
- **Frameworks & Backend:** Spring Boot, Spring Core, Spring AOP, Maven
- **Developer Tools & Environment:** Git, GitHub, Linux, Wireshark, MySQL, VS Code, CMake, PowerShell

TECHNICAL PROJECTS

Custom C++ String Library

- **Technologies:** C++, GCC, SIMD (AVX2), Git, Memory Management
- **Developed a high-performance C++ string library** leveraging Small String Optimization (SSO) to store short allocations on the stack, minimizing dynamic heap overhead.
- **Optimized memory cache efficiency and execution speed** by implementing zero-copy string views and leveraging SIMD with advanced compiler optimizations.

Spring Boot Backend Application

- **Technologies:** Java 17, Spring Boot 3.2, Spring AOP, Maven, YAML, Git
- **Built a modular Spring Boot application** utilizing constructor-based dependency injection, managed bean lifecycles, and profile-driven environment configurations.
- **Developed a custom Aspect-Oriented Programming (AOP) logging framework** with custom annotations to intercept and log method execution times at runtime.

JVM Custom ClassLoader & Reflection Sandbox

- **Technologies:** Java, Java Reflection API, Bytecode Manipulation, Git, PowerShell
- Developed a custom Java ClassLoader to dynamically parse and load bytecode binary streams at runtime.
- Utilized Java Reflection API to execute methods dynamically and isolated runtime environments across Java ClassLoader hierarchies.

EXPERIENCE & ACTIVITIES

IBM - Adroit Technologies | Cybersecurity Intern

- **Duration:** 2 Months (June 12, 2025)
- Completed hands-on training in enterprise security operations, network data analysis, and packet inspection using **Wireshark**.
- Studied security protocols and threat detection techniques for organizational networks.

Algorithmic Problem Solving

- Solved **200+** Data Structures and Algorithms problems on platforms such as LeetCode/GeeksforGeeks using C++ and Java, focusing on time and space complexity optimizations.

CERTIFICATIONS

- **Microsoft Certified:** Security, Compliance, and Identity Fundamentals (SC-900)
- **IBM Certified Specialist:** CECSA1IN Cybersecurity
- **NPTEL:** Programming in Java
- **NPTEL:** Blockchain and Its Applications
- **Google:** IT Support Professional & Python Programming Specialist
