Career Objective

Highly motivated B.Tech Cybersecurity student passionate about competitive programming, DSA, and systems architecture. Proficient in C++ and Java. Seeking a software engineering or security internship to build secure, robust, high-performance systems.

Education

- **B.Tech in Cybersecurity and Digital Forensics** | VIT Bhopal University
(Graduation: 2027)
- **CGPA:** 8.3 / 10

Technical Skills

- **Languages:** C++ (Advanced – DSA, STL, OOP), Java, Python, SQL
- **Frameworks & Core:** Spring Boot, Spring Core, Spring AOP, Data Structures & Algorithms, OOP
- **Tools:** Maven, Git, GitHub, Linux, Wireshark, MySQL, VS Code

Technical Projects

Spring Boot Core Backend Engine | [Live GitHub Repository](#) *Tech: Java 17, Spring Boot 3.x, Spring AOP, Maven, YAML, Git*

- Architected a production-grade Spring Boot core backend engine showcasing advanced framework design patterns.
- Implemented a runtime execution logging layer utilizing custom annotations (`@LogExecutionTime`) and AOP proxy interception.
- Leveraged container lifecycle hooks (`@PostConstruct/@PreDestroy`) and profile-driven configurations (`@ConditionalOnProperty`).
- Enforced strict compile-time validation and testability via explicit constructor-based dependency injection.

JVM Bootstrapping & Custom ClassLoading Sandbox | [Live GitHub Repository](#) *Tech: Java, Java Reflection API, Bytecode Manipulation, Git, PowerShell*

- Overrode native `findClass()` and `defineClass()` mechanics to design a custom ClassLoader for dynamic binary `.class` stream parsing.

- Analyzed JVM ClassLoader hierarchy (Bootstrap, Platform, Application) to enforce structural runtime security boundaries.
- Utilized the Java Reflection API to dynamically instantiate decoupled modules, eliminating compile-time dependencies.

Experience & Strengths

Cybersecurity Training Program | IBM – Adroit Technologies (*2 months*)

- Trained in enterprise security operations, data privacy paradigms, and packet-level threat hunting via Wireshark.
- **Problem Solving:** Solved 200+ complex DSA problems with a focus on algorithmic optimizations and space/time minimization.

Certifications

- Programming in Java (Professional Certification) | Microsoft SC-900 (Security Fundamentals)
- Blockchain and its Applications (NPTEL) | IBM Certified Specialist (CECSA1IN Cybersecurity)
- Google IT Support Professional | Python Programming Specialist
